

You asked! And we listened! Incorporating feedback from numerous clients, we are proud to roll out two brand new programs: the **RTL Radon Testing Service Plan** and the **RTL Lifetime Mitigation Fan Warranty Program**.

Here at RTL, we are proud to have been the Triangle's experts in radon testing and mitigation since 1988. We have given peace of minds to thousands of clients and we are now unveiling two new ways to bring even more comfort and security to our clients and their families.

We know that in the hustle and bustle of daily life, the last thing you need is one more item on your "To Do" List. With our **Radon Testing Service Plan**, we take one thing off your hands: the worry of having to remember to schedule your next recommended radon test. Simply let us know you'd like to sign up and we'll call you when the time comes with a friendly, no-obligation reminder.

We have also come up with a program that solves the only real headache that comes from owning a home with a mitigation system. The **Lifetime Mitigation Fan Warranty Program** allows our clients with mitigation systems* to avoid the cost of repairs that can be associated with the breakdown and replacement of a fan. One Continuous Radon Monitor test, performed by RTL, every 12 months will qualify your fan for **FREE** lifetime warranty replacement. We'll also perform a complimentary radon mitigation system inspection in conjunction with every appointment at no extra charge. This program does even more than removing the stress of knowing a costly replacement could be just around the corner. It also gives the added peace of mind of knowing your mitigation system continues running properly, keeping you and your family safe. Again simply let us know you'd like to be included in the program and we'll reach back out to schedule your next test and system inspection.

*Valid for any new installation or fan replacement performed Jan, 2018 or later
